

PORTABLE EV CHARGER

HIGH POWER WITH LCD SCREEN (6A-40A)

BS-PCD040

Product Overview

PCD040 is a high-power single-phase portable charger, equipped with industrial-grade LCD display, can demonstrate real-time current, voltage and time clearly, even can remain normal charging in extreme weather. It's also compatible with more than 99.5% electric vehicles.

LCD display

Monitor charging status easily.

Higher power

Faster charging speed, max. 40A

Safe use

Built in smart chip

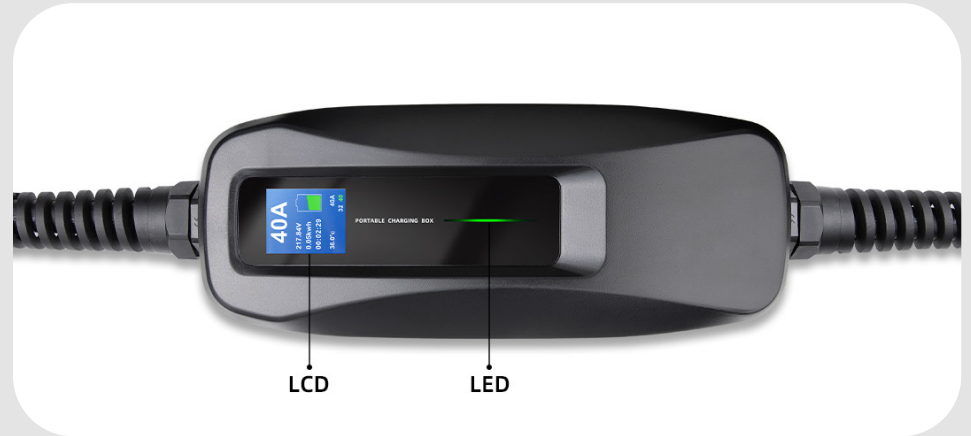

PRODUCT ADVANTAGES

PRODUCT DETAILS

BS-PCD040 High power with LCD screen (6A-40A)

LCD

LED

PRODUCT ADVANTAGES

- Higher power for a faster charging speed, max. 40amp.
- Large LCD to show real-time current, voltage and time etc.
- Safe use when working at a higher power with built-in intelligent chip.

Warning and Indicator Functions	Short-circuit Protection	Over Temperature Protection	Leakage Protection
Output Over-current Protection	Input Under Voltage Protection	Input Overvoltage Protection	Charge Status Detection

Customizable plug

Type1/Type2

Model BS-PCD040

Input & Output		Certificate	
Input voltage/Output voltage	100~250V AC	Certificate	CE, RoHS, FCC
Input frequency	47~63Hz	Function	
Max. output power	8.8KW	Ethernet/WIFI/4G/Bluetooth	No
Max. output current	40A 1Phase	LCD	1.8-inch color display
Charging interface type	IEC 62196-2, SAE J1772	RCD	Type A
Working environment		LED Indicator light	Blink (040) Rolling (041)
IP rating	IP66	Current adjusting	<input checked="" type="checkbox"/>
Environment temperature	-40°C~+75°C	Mechanical	
Relative humidity	0-95% non-condensing	Dimension (L/W/D)	265/105/55mm
Maximum altitude	<2000m	Weight	5KG
Cooling	Natural air cooling		
Standby power consumption	<8W
